Objective

A motivated and results-oriented Artificial Intelligence and Machine Learning student seeking an entry-level opportunity to apply academic knowledge in software development and AI. Focused on contributing to organizational growth through continuous learning, practical problem-solving, and the implementation of scalable technical solutions.

Education

Vishwanathrao Deshpande Institute of Technology, Haliyal	2023 – 2027
B.E. in Artificial Intelligence and Machine Learning	CGPA: 7.2
JSS R S Hukkerikar College, Dharwad	2021 – 2023
PUC	75%

Technical Skills

- **Programming Languages:** Python (Proficient), C, C++, HTML, JavaScript
- **AI & Computer Vision:** OpenCV, MediaPipe, Gesture Recognition, Hand Tracking
- **Tools & Frameworks:** Git (Version Control), Linux, Canvas API
- **Soft Skills:** Analytical Problem Solving, Time Management, Technical Presentation, Communication

Technical Projects

Touchless Illustrator | Computer Vision & HCI *MediaPipe, OpenCV, JS*

- Engineered a contactless drawing application utilizing MediaPipe for real-time hand landmark tracking and gesture detection.
- Developed a multi-modal interface integrating microphone-based voice commands for interactive functions like color changes and canvas clearing.
- Implemented high-fidelity hand-to-canvas mapping using OpenCV to ensure low-latency drawing performance.

Smart Bus Management System | Database & IoT *Python, QR Technology*

- Designed an automated transit verification system using unique student QR codes to streamline boarding and reduce manual checks.
- Developed a real-time database query system that instantly validates payment status to grant or deny access.
- Optimized transit operations by reducing fare evasion and increasing the efficiency of the boarding process.

Certifications

- Artificial Intelligence Fundamentals – IBM Skillbuild
- Python Essentials – Cisco Networking Academy
- Java Programming Fundamentals – Infosys Springboard
- Problem Solving and Process Control – IBM Skillbuild

Academic Highlights

Currently pursuing specialized coursework in Artificial Intelligence and Machine Learning[cite: 17]. Developed strong foundational skills in programming and version control while maintaining a consistent academic record and engaging in practical project implementations.
